Run your garment shop smarter - every piece tracked, every bill accurate.

A complete, customized ERP built for garment retailers and wholesalers: size-colour inventory, barcode labels, fast GST billing, purchase management and profit reports - on one simple screen, even when the internet is down.

Barcode	GST	Multi-store	Offline
every piece, every size	ready invoices	one stock view	billing continues

Core features at a glance

Barcode Inventory

- Auto-generate barcode per style / size / colour
- Print labels with MRP, size, brand and shop name
- Scan-to-bill: bill a piece in one beep
- Scan during GRN, stock count and returns
- Supports standard label printers and A4 sticker sheets

Garment Product Master

- Variants: size, colour, brand, season, fabric
- Category / sub-category and HSN-wise GST rates
- Purchase price, MRP and selling price per item
- Bulk import from Excel - no re-typing
- Reorder level alerts for fast-moving sizes

Smart Billing (POS)

- GST invoices with automatic CGST / SGST / IGST split
- Barcode or name search, discounts, multiple payment modes (cash / UPI / card)
- Hold bills, credit notes and exchange handling
- Print on A4 or thermal paper; PDF share on WhatsApp
- Customer-wise purchase history and dues

Multi-Location Stock

- Showroom, godown and branches in one system
- Stock transfer between locations with tracking
- Live stock by size and colour
- Physical stock audit with scanner and variance report
- Dead-stock and ageing visibility

Buying, selling & growing

From purchase order to the final sale, every step is connected so stock and accounts always match.

Purchase Management

- Purchase order to GRN (goods receipt) workflow
- Vendor-wise rates and purchase history
- Barcode labels printed directly from GRN
- Purchase returns and debit notes
- Supplier outstanding and payment tracking

Offers & Schemes

- Buy X get Y, bundle and combo offers
- Percentage / flat discounts by item, brand or category
- End-of-season sale rules applied automatically
- Scheme engine prevents billing mistakes
- Festival offers set up in minutes

Customer Portal

- Customers browse catalogue and place orders from mobile
- Online order converts to bill in one click
- Installable app (PWA) for customers
- Customer database for SMS / WhatsApp marketing
- Delivery order tracking

Vendor Portal

- Suppliers see purchase orders online
- Faster confirmations, fewer phone calls
- Transparent order and delivery status
- Reduces manual follow-up work
- Secure separate login for each vendor

Works Without Internet

- Offline-first billing - sales never stop
- Bills sync automatically when internet returns
- Ideal for weak-network markets and malls
- Local data kept safe on the device
- No lost invoices, no duplicate bills

Security & Control

- Role-based access: owner, manager, cashier
- Full activity log - who did what and when
- Invoice cancel / edit controls with audit trail
- Regular database backups
- Your data stays yours

Reports, support & why choose us

Know your best sellers, your slow stock and your real profit - every day, not just at year-end.

Report	What it tells you
Sales summary	Daily / monthly sales by item, size, brand, salesperson
Stock summary	Current stock with value at cost and at MRP, location-wise
Fast & slow movers	Which sizes and styles to re-order, which to discount
Profit & margin	Item-wise gross margin using purchase price
GST reports	Sales / purchase tax summary, HSN-wise, ready for filing
Outstanding	Customer receivables and supplier payables
Export	Excel and PDF download for your accountant
